ABOUT US

TOZO was established in Seattle

Supported by 16+ million users; Commented by 900,000+ customers.

TOZO is committed in research, develop and manufacture of high-tech digital products. Include wireless audio, smart IOT, virtual reality, and digital accessories.

TOZO is Powered by energenic R&D Team and world's top factories. Dedicated to produce best quality products by choosing high quality and healthy environment protection materials, shortening intermediate links and improving efficiency. In order to clients can get excellent products and extreme user experiences and green low-carbon life.

PROFESSIONAL TEAM

Possessing a good corporate culture, a sound corporate management system, core channel customers, innovative development strategies, a strong technical core and talent advantages have laid the foundation for our brand development. With keen market insight, we will definitely succeed in the market.

In the field of audio, TOZO takes "Technology Surrounds You" as its core product concept, to achieve the perfect integration of innovative technology and simple design, create comfortable wireless products involving ultimate experience, restore the purest sound of nature, and provide users with music Temple-like hearing enjoyment.

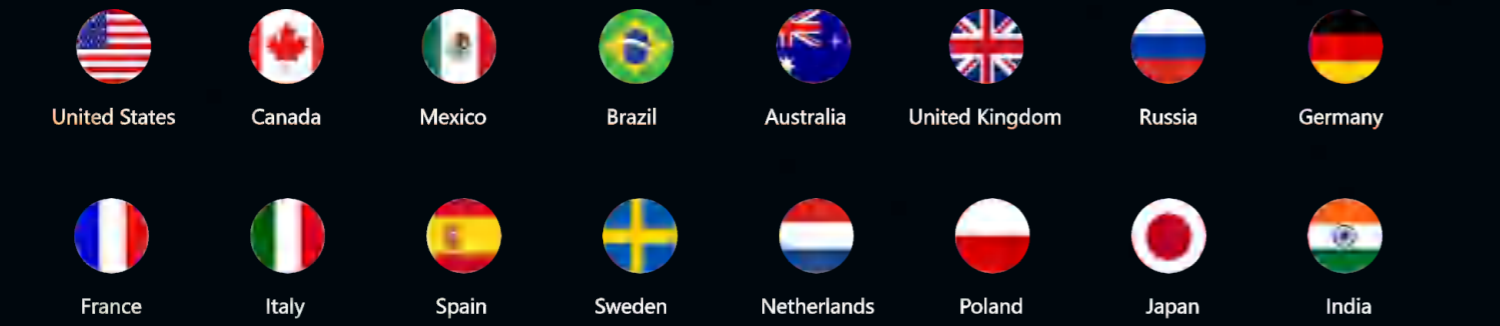

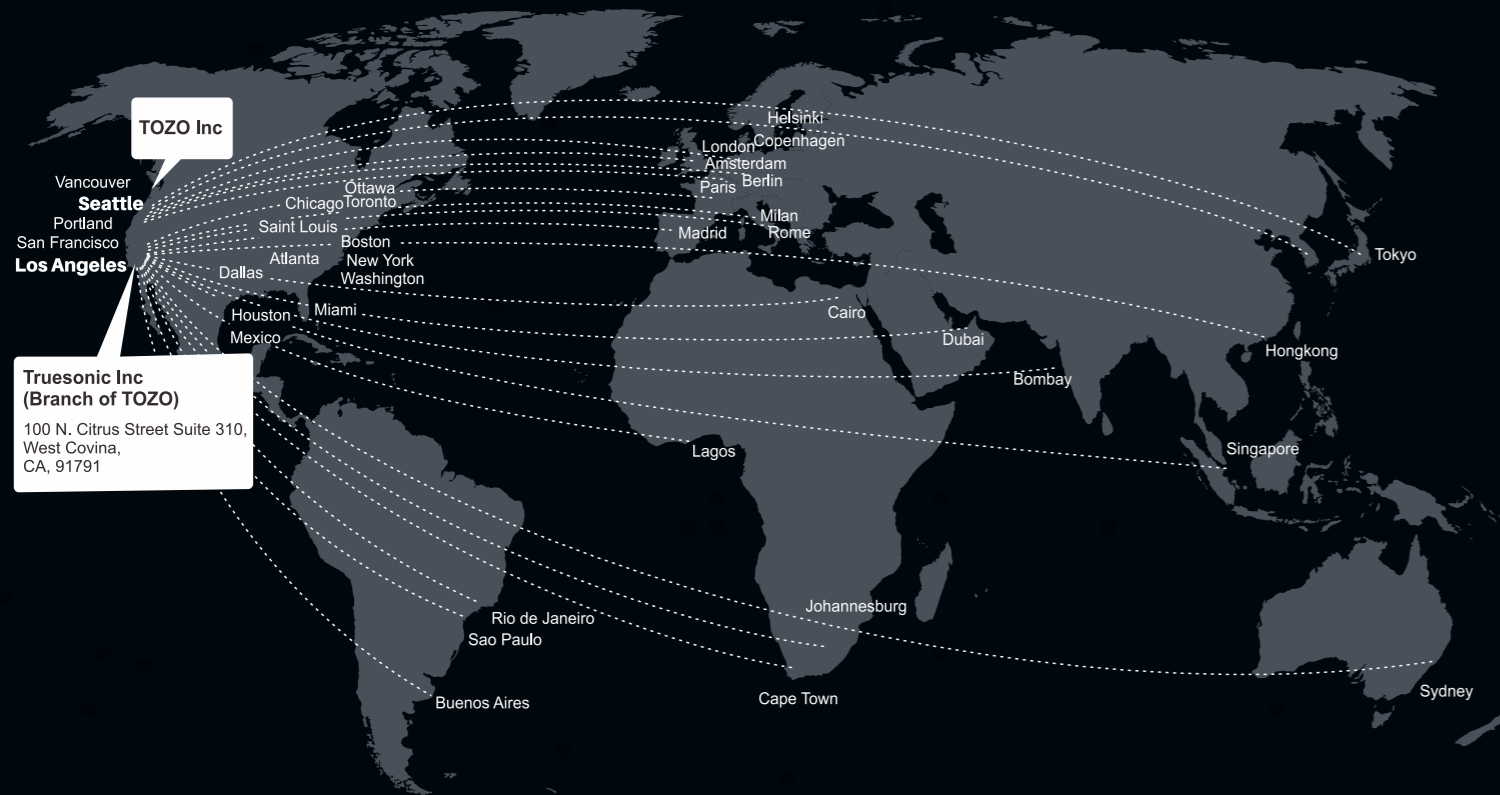

In the future, TOZO will not forget its original intention and use e-commerce or a broader platform as the medium to continue to work hard and create surprises in filed of technological product, technological research, development and user experience. Furthermore, we will continue to seek progress that meets the needs of users in order to create an unprecedented ultimate experience.

APPAREL

High Quality Wireless Music Listening Technology

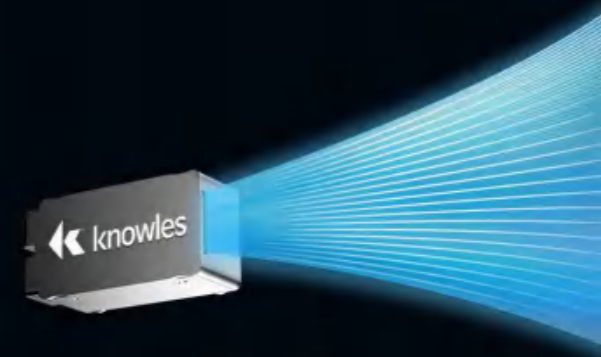

From Sony's official data, LDAC HD data transmission is more than 3 times faster than SBC traditional Bluetooth coding technology, The maximum transmission speed is about 990kbps, which can enhance the wireless listening experience of music.

ORIGX Acoustic

TOZO research HI-FI digital, material and cavity acoustic technology that compensates for the frequency lost when the sound passes through the ear canal curve, keeping the sound that reaches the eardrum is closest to reality.

Custom Armature Driver Unit with Knowles

High sensitivity and high resolution moving Armature Driver can hear more sound details and present cinema level sound effects. 12mm super large Armature Driver is 90% larger than the traditional single armatured, with clear treble, soft and mellow midrange, powerful bass and transparent human voice.

FEATURES

[Balanced Armature Drivers and Dynamic Drivers] The combination of precise dynamic driver creates powerful bass while a balanced armature driver provides crisp clear mids and highs for perfect clarity. The unique crossovers can provide higher sensitivity, lower distortion, and more detail on these true wireless earbuds.

[LDAC Technology & Hi-Res Audio Wireless] Support Hi-Res Audio Wireless gold label by JAS and LDAC certificated by SONY, enjoying the immersive sound quality of high resolution within the wireless scenarios.

[ANC&ENC Noise Cancellation] The Active Noise Cancellation (ANC) shields you from all noise outside the game, allowing you to immerse yourself in the communication and game environment with your teammates. At the same time Environmental Noise Cancellation (ENC) Technology with 6 mic built-in blocks out 80% of background noises and make your voice 3x times clearer on the other side.

[Bluetooth 5.3 & Long Distance Connection] With Bluetooth 5.3 technology and rod-shaped earphone has a connection distance of 15m, has superior sound quality and strong signal, so that there is no disconnection in listening to music or making phone calls.

[Large Battery Capacity & Smart LED Digital Display] Features with touch control sensors, TOZO Golden X1 earbuds can provide at least 32 hours of long battery life. In Wireless Charging case, the smart LED digital screen can check battery consumption display anytime.

BASIC PARAMETER

Support type: HFP / HSP / A2DP / AVRCP

Earbuds battery capacity: 55mAh × 2

FEATURES

[Active Noise Cancellation] Hybrid 3 layer Active Noise Cancellation.

1. Outward-facing microphone detects external sounds and counter with equal anti-noise to first cancel noise.
2. Inward-facing microphone listens inside ear canal to pick up internal sounds and produce anti-noise again to twice cancel the left noise.
3. Ear caps prevent 90% noise going to ear canal.

[Transparent Mode] You can hear what you want to hear, which lets outside sound in so you can hear and interact with the world around you. You can clearly hear the announcement of the airline or subway and what is being said around you without taking off the headphones.

[Built-in Dual Noise Cancelling Microphone] Double microphone noise reduction system suppresses environmental noise. A dedicated internal and two external microphones pick up your voice and isolate it from outside noise.

[One-step Pairing] Pick up the headsets from the charging case, and they will be paired automatically. Then simply enable bluetooth connection on your mobile phone to pair the device with your earbuds.

[Charge on the Go] TOZO NC9 Pro wireless earbuds can last for over 10.5 hours' play time from a single charge and 24 extra hours in the compact charging case. Providing convenient charging with no strings attached.
